

CHAU TRAN

New York, USA | chautrancmt26@gmail.com | [LinkedIn: chautrancmt26](#) | [GitHub: CTC3PO](#) | [chautran.dev](#)

PROFESSIONAL SUMMARY

Software Engineer and Computer Science Master's graduate from UPenn with production frontend and full-stack engineering experience at Datadog. Proven track record in building scalable UI component frameworks, automated data pipelines, and data-intensive web applications. Proficient in Python, JavaScript/TypeScript, React, Node.js, and SQL with experience in cloud monitoring systems and applied machine learning.

EDUCATION

University of Pennsylvania *Master's, Computer Science + AI Certificate*

January 2023 - May 2026

Relevant Coursework: Data Structures & Algorithms, Computer Systems, Big Data Analytics
Artificial Intelligence, Natural Language Processing, Gen AI for Environment

GPA: 3.70

New Jersey Institute of Technology *Master's, Urban Studies*

September 2017 - December 2018

| GPA: 3.85

New Jersey Institute of Technology *Bachelor's, Architecture*

September 2013 - May 2018 |

GPA: 3.83

PROFESSIONAL EXPERIENCE

Datadog

New York, NY

Software Engineering Intern

June 2025 - August 2025

- Architected and deployed production React/TypeScript UI components for metrics, logs, and traces telemetry visualization, utilizing Redux for real-time state management and data filtering.
- Standardized query-building experiences across Datadog core telemetry products by migrating legacy query editors to a shared enterprise component framework.
- Improved frontend maintainability, code modularity, and component reusability across high-throughput monitoring dashboards.

New York City Department of City Planning

New York, NY, USA

Urban Planner

June 2019 - January 2025

- Managed city-wide studies and spatial data analysis using Python (Pandas, GeoPandas, SQL) and GIS tools to evaluate land-use policy impact.
- Built interactive GIS visualization web tools and dashboards, empowering cross-functional engineering and policy teams with data-driven decision making.
- Communicated and demystified complex land-use policy and zoning proposals to executive leadership and public stakeholders through data visualizations.
- Guided private applicant teams of architects, designers, counsel, and stakeholders to improve land use and design applications.

University of Pennsylvania

Remote

Teaching Assistant

January 2024 - December 2024

- Mentored 100+ graduate CS students in Data Structures, Algorithms, and Software Engineering design patterns, leading weekly technical recitations and evaluating code quality.

Interboro Partners

New York, NY, USA

Urban Designer

May 2018 - February 2019

- Developed digital engagement tools and interactive materials for community planning projects.

The Metropolitan Museum of Art

New York, NY, USA

Research Intern

May 2016 - October 2016

- Researched and audited museum collection database records to support curatorial documentation and organize annual symposium logistics.

SKILLS

Programming Languages: Python, JavaScript/TypeScript, Java, C/C++, SQL

Frameworks, Tools & Libraries: React, Next.js, Node.js, FastAPI, Redux, PyTorch, Scikit-learn, Pandas, PostgreSQL

Developer Tools & Methodologies: Git, Docker, REST APIs, ETL Data Pipelines, 3D Geospatial Modeling, Agile

PROJECTS

• ZR-Explore: NYC Zoning Navigator – 3D Web App

Full-stack 3D geospatial web app (React, Three.js, Mapbox, FastAPI). Integrates a RAG AI assistant (LangChain, Vector DB) for automated buildable envelope calculations from official legal text. | [GitHub](#) | [View Project](#)

• Volunteer Management System – Full-Stack PWA

Full-stack Progressive Web App (Next.js, Node.js, PostgreSQL). Features RESTful API endpoints, automated CSV data ingestion pipelines, and offline-first client caching. | [GitHub](#) | [View Project](#)

• Nutri-Score Prediction – Machine Learning Model

End-to-end ML data pipeline (Python, PyTorch, Scikit-learn) processing 1M+ records. Features automated feature extraction, model benchmarking, and hyperparameter tuning. | [GitHub](#)
